

Postdoctoral Researcher Positions Available Now

Who We Are:

An **interdisciplinary** team exploring unlimited opportunities to bring **fundamental research**, **engineering** and **clinical science** together to advance optical imaging technologies.

Who You Are:

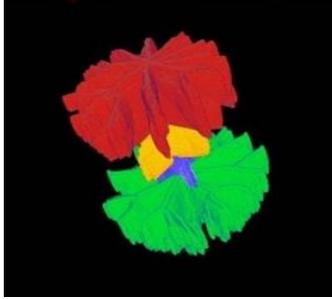

PhD in physics / engineering or related field. Experience in optics, optical design and instrumentation, electronics or programming is preferred. Motivated and enthusiastic person to turn challenges into opportunities.

You Will:

- Design and build novel imaging instrumentation (e.g. OCT, microscope),
- Develop image data analysis algorithms.
- Collaborate with clinicians to assess the performance of novel imaging methodologies.

Interested candidates should contact:

Dr hab. Ireneusz Grulkowski, prof. UMK
